

AIKB Radio Project: Information Sheet

Title: P23-Info-Dechets

Introduction	Henry Douglas talks to Nicholas Besseau from the CCKB Rostrenen who is responsible for the dechetterie service there.
Henry	Who is responsible for sorting the rubbish for recycling?
Nicholas	The major responsibility seems to lie with individual citizens for sorting their own rubbish for recycling. There are 3 main types of rubbish – general household, plastic and glass; then, of course, the service provided by the dechetterie. This is the local tip which is provided for larger items and waste.
Henry	What percentage of rubbish is recycled here?
Nicholas	Fifty percent of the waste collected seems to be successfully recycled.
Henry	How many dechetteries are there?
Nicholas	There are about 12 tips (dechetterie) available within the area around Pontivy. If you just check with your local Town Hall you'll find the dechetterie that's nearest to you.
Henry	Where can I get the best advice on what can be recycled here?
Nicholas	The best advice can be found in the information leaflets that are issued by the Communauté de Commune. These are available from your local Maire and copies are written in English. You can also get a wealth of general information from the internet. For further information try Eco Emballages. www.ecoemballages.fr
